PROFILE SUMMARY

Computer Science Engineering student specializing in Cyber Security with strong skills in **Python, SQL, and full-stack web development**. Experienced in building scalable applications using **React, FastAPI, and MySQL**, developing REST APIs, implementing authentication systems, and deploying web applications. Completed a Frontend Development internship focused on **responsive UI development and modern web technologies**. Passionate about **software engineering, algorithms, and problem solving**, seeking a **Software Development Internship** to build impactful and scalable software solutions.

EDUCATION

B.E. Computer Science and Engineering (Cyber Security)

Sri Sairam Engineering College, Chennai

2024 – 2028 (Expected) **CGPA:** 8.89 / 10 (up to Semester 3)

PROJECTS

StreakForge – LeetCode Streak Reminder Web Application

Technologies: React, FastAPI, JWT Authentication, SMTP, REST APIs

Live Demo : <https://streak-forge-33fu.vercel.app>

- **Engineered a full-stack web application** using **React.js** and **FastAPI** to automate tracking of daily LeetCode practice streaks for **10+ active users**.
- **Implemented secure authentication** using **JWT-based authorization**, enabling protected user login and account management.
- **Developed RESTful APIs with FastAPI** for efficient user data management and activity tracking, and integrated an **SMTP-based (Brevo) email notification system** to send automated daily reminders.
- **Built a responsive React.js interface** and deployed the application on **Vercel**, ensuring reliable cloud hosting and smooth user experience.

Estate Prophet – House Price Prediction Application

Technologies: Python, Random Forest Regression, React

Live Demo : <https://housepricepredictionsmodel.netlify.app>

- **Developed a machine learning web application** using **Python** and **Random Forest Regression** to predict real-estate prices based on property features.
- **Designed and implemented a responsive React.js frontend** with a **Neo-Brutalism UI**, improving usability and user interaction.
- **Integrated machine learning models with the web interface** to enable **real-time property price prediction** and seamless data flow between frontend and backend.
- **Implemented financial conversion logic (USD → INR Lakhs)** tailored for the **Indian real-estate market**, and **deployed the application on Netlify** for scalable and reliable cloud hosting.

EXPERIENCE

Front-End Development Intern

Sri Sairam Techno Incubation Center

Dec 2025 – Jan 2026

- Developed responsive web interfaces using HTML, CSS, JavaScript, and React.js.
- Applied component-based UI development concepts using React framework.
- Assisted in building interactive and user-friendly web pages for web applications.
- Gained practical experience in frontend development workflow, debugging, and UI design.

TECHNICAL SKILLS

- **Languages:** Python, C, Java, SQL
- **Frontend Development:** HTML, CSS, JavaScript, React
- **Backend:** FastAPI, REST API Development, JWT Authentication
- **Databases:** MySQL, SQL*Plus
- **Tools:** Git, GitHub, VS Code, VMware
- **Core Concepts:** Object-Oriented Programming, Data Structures(OOPS), Problem Solving

CERTIFICATIONS

- Data Science for Engineers
- Python for Data Science
- The Joy of Computing using Python

ACHIEVEMENTS

- Secured **2nd Place** in the **PredictG Machine Learning Event** at **Talos 5.0 National Level Symposium**, organized by **Chennai Institute of Technology (CIT), Chennai**, winning a **2000 cash prize**.
