PROFILE SUMMARY

Computer Science Engineering student specializing in **Cyber Security** with strong skills in **Python**, **SQL**, and full-stack web development. Experienced in building scalable applications using **React**, **FastAPI**, and **MySQL**, developing REST APIs, implementing authentication systems, and deploying web applications. Completed a Frontend Development internship focused on responsive UI development and modern web technologies. Passionate about software engineering, algorithms, and problem solving, seeking a **Software Development Internship** to build impactful and scalable software solutions.

EDUCATION

B.E. Computer Science and Engineering (Cyber Security) 2024 – 2028
Sri Sairam Engineering College, Chennai

PROJECTS

StreakForge – LeetCode Streak Reminder Web Application

Technologies: React, FastAPI, JWT Authentication, SMTP, REST APIs

Links: [Live Demo](#) — [GitHub](#)

- Developed a full-stack LeetCode streak tracking application using React.js and FastAPI, enabling automated daily practice monitoring with secure JWT-based authentication.
- Designed and implemented RESTful APIs with FastAPI, integrating Brevo SMTP services to deliver automated email reminders and efficiently manage user activity.
- Built and deployed a responsive, cloud-hosted application on Vercel, ensuring seamless user experience, scalability, and reliable performance.

Resume Analyzer – AI-Powered Resume Analysis Platform

Technologies: React 19, Vite, Tailwind CSS, FastAPI, Python, Google Gemini API, PyMuPDF, Sentence Transformers, Scikit-learn

Links: [Live Demo](#) — [GitHub](#)

- Developed an AI-powered resume analysis platform using React, FastAPI, and Google Gemini API that analyzes PDF resumes against user-specified job roles using semantic similarity and LLM-based evaluation.
- Implemented intelligent resume parsing, keyword gap analysis, skill matching, personalized recommendations, and resume-job alignment using Sentence Transformers, PyMuPDF, and FastAPI.
- Designed a modern, responsive user interface with secure PDF upload, real-time analysis results, and deployed the application on Vercel, delivering a scalable AI-powered resume evaluation experience.

GitSense AI – AI-Powered GitHub Repository Chatbot

Technologies: React 19, Vite, Tailwind CSS, FastAPI, Python, LangChain, Google Gemini API, PostgreSQL, pgvector, Sentence Transformers

Links: [GitHub](#)

- Developed an AI-powered GitHub repository chatbot using React, FastAPI, LangChain, and Google Gemini API, enabling developers to interact with and understand codebases through natural language conversations.
- Implemented repository ingestion, AST-based code chunking, vector embeddings, and Retrieval-Augmented Generation (RAG) using PostgreSQL, pgvector, and Sentence Transformers to deliver accurate, context-aware responses.
- Designed a modern, responsive user interface with session-based repository management, real-time AI chat, and downloadable conversation history, providing an efficient developer experience for exploring large code repositories.

EXPERIENCE

Front-End Development Intern Dec 2025 – Jan 2026
Sri Sairam Techno Incubation Center

- Developed responsive web interfaces using HTML, CSS, JavaScript, and React.js.
- Applied component-based UI development concepts using the React framework.
- Assisted in building interactive and user-friendly web pages for web applications.
- Gained practical experience in frontend development workflow, debugging, and UI design.

TECHNICAL SKILLS

- Languages:** Python, Java, SQL, JavaScript
- Frontend:** React, HTML5, CSS3, Tailwind CSS, React Router DOM
- Backend:** FastAPI, REST APIs, JWT Authentication
- AI Technologies:** LangChain, Retrieval-Augmented Generation (RAG), Sentence Transformers
- Databases:** PostgreSQL, MySQL, pgvector
- Libraries:** Scikit-learn, PyMuPDF
- Developer Tools:** Git, GitHub, VS Code, Vercel
- Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Problem Solving
